

MLGTS' POLICY ON ENVIRONMENTAL RESPONSIBILITY

A commitment to the environment and sustainable development is directly connected with the intention to provide the highest quality and global service at **Morais Leitão, Galvão Teles e Soares da Silva, R.L.** (MLGTS). MLGTS is committed to incorporating the most up-to-date environmental practices in its development strategy and operational practices, promoting disclosure, environmental awareness and commitment to its suppliers, collaborators and clients.

MLGTS' priorities are:

COLLABORATORS, SUPPLIERS AND CLIENTS

To promote environmental awareness and encourage our collaborators to assess the environmental impact of their professional activity

To offer our collaborators the possibility of the formation of an environmentally sound work environment and to create opportunities that allow them to participate in our environmental policy.

To find solutions with our clients that reduce the environmental impact on the way we provide services.

To perform an environmental evaluation of the services and products offered by our suppliers, giving preference to services and products with a lower environmental impact.

ENERGY AND POLLUTANT EMISSIONS

To optimise the expenditure of electric power in our offices.

To use technology and electrical resources to reduce the need to travel.

To adopt programs of continuous reduction and evaluation of energy costs and emission of pollutants.

WATER AND WASTES

To embrace programs for the recycling of solid waste, specifically, the paper used in our professional activity.

To actively promote reutilization and recycling.

To embrace commercial and professional practices which promote waste reduction.

To adopt measures which reduce water consumption.

COMPLIANCE AND ENVIRONMENTAL ASSESSING SYSTEMS

To respect applicable environmental laws.

To progressively obtain systems of assessing environmental impact and emission of pollutants.

To progressively obtain certification of the standard ISO 14001

Environment Management Systems (EMS).
