

ELSA WEBINARS ACADEMY ON ENERGY LAW

OCTOBER 4TH - 8TH 2021

ELSA Portugal takes pride in presenting its most recent project to the ELSA Network and to our Partners: ELSA Webinars Academy on Energy Law. The four-day online legal course will offer our participants a fair insight into the energetic scenery in Portugal and how the portuguese Law sees and deals with it. While it does approach the hottest topics in the field, it also delves deeper into crucial details, which often go unnoticed on our studies' plan.

The project will be held on ClickMeeting, organized in english and shared throughout a vast community which covers more than 44 countries. In our rich academic programme, comprised of around 7 different sessions and around 10 experts, you'll find the contradistinction between renewable energies and fossil energies, including the Law's impact on the oil supplies. Also, the participants will have the opportunity to discuss crucial topics, such as the future of our energetic sources and providers.

Our plan is to present a variety of qualified speakers which include lawyers, professionals from the energetic sector, lawyers, entrepreneurs and judges to show their different perspectives on the sector, and the laws that binds it.

The event's success will be shown by a higher legal education of our Members and all the young generations of law students and professionals on the field. Hopefully, we will provide them with the tools to a more critical judgement of the portuguese system, at the same time as we feed their social responsibility notion, towards a better and brighter tomorrow.

Join us on this journey to a more educated world and discover how the Law is working on these topics, always so close to all of us.

Help us change the world, towards ELSA's Vision, "a just world in which there is respect for human dignity and cultural diversity", by helping us fulfill our true purpose: "to contribute to legal education, to foster mutual understanding and to promote social responsibility of law students and young lawyers".
